CONTENTS TO VOLUME 26

Part 1 September 1966

The peeling of a flexible strip attached by a viscous adhesive. A. D. McEwan and G. I. Taylor *page* 1

On the steady Krook kinetic equation: Part 1. Donald G. Anderson 17

Grid turbulence at large Reynolds numbers. A. L. Kistler and T. Vrebalovich 37

Large-amplitude Bénard convection. George Veronis 49

Flow through a rapidly rotating conduit of arbitrary cross-section. G. S. Benton and D. Boyler 69

Shallow-water flows past slender bodies. E. O. Tuck 81

Incompressible flow along a corner. Stanley G. Rubin 97

Some experiments in partially dissociated boundary layers. P. G. Simpkins 111

On almost rigid rotations: Part 2. K. Stewartson 131

Hydrodynamic stability of the boundary layer on a continuous moving surface. F. K. Tsou, E. M. Sparrow and E. F. Kurtz 145

The integration of the two-dimensional laminar boundary-layer equations past the point of vanishing skin friction. D. Catherall and K. W. Mangler 163

The effect of mean velocity variations on jet noise. G. T. Csanady 183

A study of turbulence at a wall using an electrochemical wall shear-stress meter. James E. Mitchell and Thomas J. Hanratty 199

Reviews

Theory of Jets in Ideal Fluids 222

Turbulent Boundary Layers in Compressible Gases 224

Part 2 October 1966

The effect of initial conditions on the development of a free shear layer. P. Bradshaw 225

The stability and transition of an axisymmetric wake. Hiroshi Sato and Osami Okada 237

The flow in a turbulent boundary layer after a change in surface roughness. A. A. Townsend 255

Thin-flame theory for a fuel droplet in slow viscous flow. Francis E. Fendell, Maureen L. Sprankle and David S. Dodson 267

An experimental investigation of the instability of an incompressible, separated shear layer. F. K. Browand *page* 281

The solitary wave of maximum amplitude. Charles W. Lenau 309

The structure of the wave front in spinning detonation. D. H. Edwards, D. J. Parry and A. T. Jones 321

The flow of a jet from a body opposing a supersonic free stream. P. J. Finley 337

Wind-generated waves in thin liquid films. Alex D. D. Craik 369

Report on the I.U.T.A.M. symposium on rotating fluid systems. F. P. Bretherton, G. F. Carrier and M. S. Longuet-Higgins 393

Dynamics of rotating fluids: a survey. M. J. Lighthill 411

Part 3 November 1966

The vorticity jump across a flow discontinuity. Sune B. Berndt 433

On the instability of ventilated cavities. L. C. Woods 437

Thermal equilibration behind an ionizing shock. H. Wong and D. Bershader 459

Turbulent boundary layers in decreasing adverse pressure gradients. A. E. Perry 481

Bed forms in alluvial channels. A. J. Raudkivi 507

The boundary-layer regime for convection in a rectangular cavity. A. E. Gill 515

Magnetohydrodynamic lubrication flow between parallel plates. E. Roland Maki, Dennis C. Kuzma and Russell J. Donnelly 537

Harmonic generation in Taylor vortices between rotating cylinders. H. A. Snyder and R. B. Lambert 545

The separation of Newtonian shock layers. J. R. Ockendon 563

A technique for the precise measurement of small fluid velocities. D. James Baker 573

Numerical solutions of the steady-state vorticity equation in rectangular basins. John A. T. Bye 577

Periodic oscillations in a model of thermal convection. Joseph B. Keller 599

The refraction of a plane shock wave at a gas interface. L. F. Henderson 607

Reviews

Differential–und integral–ungleichungen 638

PART 4 DECEMBER 1966

The influence of simple supports on the radiation from turbulent flow near a plane compliant surface. J. E. FFOWCS WILLIAMS *page* 641

Wind action on water standing in a laboratory channel. G. M. HIDY and E. J. PLATE 651

The mechanism of entrainment in free turbulent flows. A. A. TOWNSEND 689

Dynamics of flexible slender cylinders in axial flow. Part 1. Theory. M. P. PAIDOUSSIS 717

Dynamics of flexible slender cylinders in axial flow. Part 2. Experiments. M. P. PAIDOUSSIS 737

Subcritical convective instability. Part 1. Fluid layers. DANIEL D. JOSEPH and C. C. SHIR 753

Subcritical convective instability. Part 2. Spherical shells. DANIEL D. JOSEPH and SHLOMO CARMI 769

Jets and plumes with negative or reversing buoyancy. J. S. TURNER 779

Nearly equilibrium dissociating boundary-layer flows by the method of matched asymptotic expansions. GEORGE R. INGER 793

The influence of Coriolis force on surface-tension-driven convection. A. VIDAL and ANDREAS ACRIVOS 807

Evaluation of the momentum equation for a turbulent wall jet. J. L. CHAO and V. A. SANDBORN 819

On the viscous flow in the nose region of a symmetric blunt body in hypersonic flow. B. S. H. RARITY 829

REVIEWS

A Testbook of Magnetohydrodynamics 840

Fundamentals of Gas Dynamics 843

SHORTER NOTICES 844

Proceedings of the 1965 *Heat Transfer and Fluid Mechanics Institute* 844

Proceedings of the Summer Seminar in Magnetohydrodynamics 844

Rarefied Gas Dynamics 845

Proceedings of the Second Australasian Conference on Hydraulics and Fluid Mechanics 845

Single and Multi-component Flow Processes 845

Directory of Fire Research in the United States 845
